

THE PENTAGON

FBI agents immediately confiscated all video evidence from the surrounding buildings of the Pentagon within moments after the attack and with eighty video cameras around the Pentagon, why have we only been shown five grainy frames from a security camera as evidence?

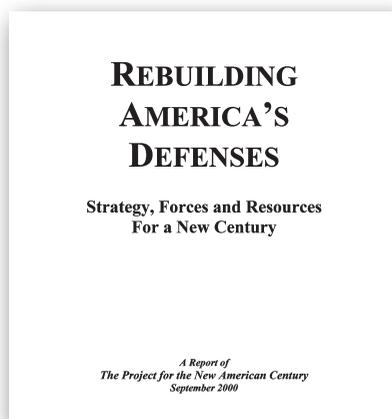

Hani Hanjour was evaluated by his instructor as incompetent at flying a single engine prop-plane. How are we to believe he maneuvered a commercial airliner in an extreme turn, at a high speed, all while dropping 7,000 feet in two minutes to hit the Pentagon inches above the lawn? Many experienced pilots feel this to be extremely difficult, if not impossible. Pilots have found many inconsistencies from the Flight Data Recorder of Flight 77 to the actual events.

The 9/11 Commission Report states that the flight path taken by Flight 77 was on the south side of the Citgo station. This directly contradicts the flight path from the Flight Data Recorder that was released by the NTSB. The data shows clearly that the path of the plane was not only on the north side of the Citgo station, but was not near the light poles that were allegedly hit and knocked down by Flight 77.

76 PAGE MOTIVE

The Project for The New American Century, a neo-conservative think tank, wrote a paper in September 2000 titled 'Rebuilding America's Defenses', where they stated that their goals of total US Military superiority would take a long time to achieve, "absent some catastrophic and cataclysmic event - like a new Pearl Harbor." One year later they got their event.

HOW COME?

In the event of a hijacking, all airline pilots are trained to key an emergency four-digit code into their plane's transponder, surreptitiously alerting air traffic controllers. How is it that not one of the pilots, in any of the hijacked planes entered the code?

With a simple shove of the yoke down, anyone not buckled in would be slammed to the roof of the plane and a simple pull back on the yoke would slam them to the floor disabling any hijacker. How are we to believe that none of the pilots thought to do this, and instead just handed over their plane?

Construction Steel has an extreme high melting point of 2800°F and NIST reported that the fires only got to a maximum of 1800°F for just 15 minutes. Why did firefighters describe a "foundry" of molten steel at Ground Zero, and why did it fume for months after the event?

COINCIDENCES, CONTRADICTIONS, AND LIES

On September 10th, 2001 Donald Rumsfeld announced that the Pentagon had 2.3 trillion dollars of undocumented adjusts, meaning the money is missing.

The accountants responsible for tracking down the missing money happened to be in the section of the Pentagon that was destroyed; they were killed that day, along with their investigation.

The White House claimed that the idea that planes would be used as weapons was never considered. However, in 1994 Frank Corder crashed a single-engine Cessna onto the lawn of the White House, two stories below the presidential bedroom. In 1995 a plan named Operation Bojinka was discovered where terrorists planned to hijack planes and detonate bombs over US cities. During the G8 Summit in 2001, attended by President Bush, the airport in Genoa was closed and surface-to-air missiles were engaged to protect against similar plane attacks.

Thousands of American and British troops along with carrier task forces were massed on the borders of Tajikistan, Uzbekistan and Pakistan as well as other countries, all while President Bush had the launch order to attack Afghanistan on his desk the day before 9/11.

Six weeks before 9/11 Larry Silverstein purchased the entire WTC complex adding an insurance policy that specifies coverage against a terrorist attack.

The company in charge of security at the WTC, Stratesec, involved Marvin Bush (the former president's brother) as a principal owner. It was also engaged in providing security for United Airlines and Dulles Airport, where Flight 77 took off.

For many years, the military commanders in charge of interceptors had the authority to order a shoot-down on their own. Just months before 9/11, the Bush Administration changed these rules so that any such order would have to be approved by the Secretary of Defense directly.

Yes, of course, it's all just bureaucratic incompetence. Billions upon billions of dollars in defense and yet the systems to defend against such an attack were not in place. We are told there was nothing that could have been done to prevent the attacks. So with more money to defense, incompetence seems to get rewarded with no accountability.

TEN REASONS WHY YOU SHOULD QUESTION 9/11

- 1 After waiting 442 days to get an investigation started, why did the 9/11 Commission fail to answer 70% of the questions from the victim's families?
- 2 Why have the co-chairs of the 9/11 Commission, Lee Hamilton and Thomas Keane, written in their book *Without Precedent* that the 9/11 Commission was "set up to fail?"
- 3 Why was there no mention in the 9/11 Commission Report of WTC Building 7, a 47-story tall skyscraper which was the third building to totally collapse that day?
- 4 Why are so many Senior Military, Intelligence Service, Law Enforcement, Government Officials, Engineers, Architects, Pilots, Aviation Professionals and Professors questioning the official story of 9/11?
- 5 With more than 80 video cameras surrounding the outside of the Pentagon, why have we only been shown a few frames of the impact?
- 6 Why is there absolutely no indication of Osama Bin Laden's connection to 9/11 on the FBI Most Wanted List?
- 7 What force pulverized most of the concrete and office material of the Twin Towers into dust, and was able to eject steel beams into buildings over 400 feet away? Gravity could not have done this alone.
- 8 Why wasn't the chief of the Pakistani Intelligence Agency investigated for the transfer of \$100,000 to Mohammed Atta, the leader of the 19 hijackers?
- 9 In August 2003, it was revealed that the government ordered the EPA to lie about the air quality at Ground Zero, resulting in 50,000 sick and dying first responders. Why has no one been held accountable?
- 10 Just one of these statements is reason enough to question what you were told about 9/11. There are more than ten reasons, so why not read on.

WTC BUILDING SEVEN

At 5:20 PM, the 47-story steel framed building collapsed vertically, falling in 6.5 seconds into a pile only seven stories tall, much like a controlled demolition.

If the structural damage on the south side had been the only cause of collapse, the building would have toppled over. Photos from the other three sides of the building show little fire or damage.

The symmetrical collapse would require all 58 perimeter columns and 25 core columns to be cut at precisely the same time. Professionals require computer-controlled detonators to achieve this precision.

Days after 9/11, the rubble showed temperatures of 1200°F (as measured by NASA aircraft). How can office furniture and carpet burn so hot inside an oxygen starved rubble pile? Why was it still fuming months after the event?

BBC and CNN reported that WTC 7 had collapsed twenty minutes and one hour, respectively, before it actually collapsed. How would they know this when no high rise steel framed building has ever collapsed due to fire in history prior to 9/11? What officials told them and why is this not in the report?

Fire and Police personnel were warned to get people back because the building was about to collapse or “blow up,” as one police officer can be heard saying to a CNN reporter. What officials made this determination, and how?

Building 7, also known as the Solomon Brothers Building, contained numerous government offices, including the CIA, FBI, FEMA, and some offices of the Securities and Exchange Commissions (SEC). Many files on the Enron and MCI WorldCom investigations were destroyed in the collapse.

Due to the structural integrity of the building, Mayor Giuliani’s emergency command bunker was installed on the 23rd floor. It was a heavily reinforced and self-contained section of the building that would have made a total collapse even more unlikely.

“We built in enough redundancy to allow entire portions of floors to be removed without affecting the building’s structural integrity, on the assumption that someone might need double-height floors,” said Larry Silverstein, president of the company that owned WTC 7.

After seven years and five different explanations for the collapse, NIST produced their final report and came up with a new, unprecedented theory of “Thermal Expansion” as the only explanation of how the building could have collapsed. Again, many Architects and Engineers recorded a multitude of inaccuracies in this report.

Look at the image on the right of a chunk sliced from WTC 3 yet this building did not collapse.

SHOW ME THE MONEY

On September 10th, Pakistani Intelligence Agent Saeed Sheik wired \$100,000 to Mohammed Atta, on an order from Mahmoud Ahmad, chief of Pakistani Intelligence. Why did our supposed ally in the war on terror send \$100,000 to a known terrorist?

Interestingly enough, Mahmoud Ahmad was also in Washington on the morning of 9/11, meeting with future CIA chief George Tenet. This was not investigated by the 9/11 Commission.

The week leading up to 9/11, an extremely high number of PUT options were placed on American Airlines and United Airlines stock indicating someone knew those stocks would decrease in value. American Airlines experienced four times and United Airlines twenty-five times above normal option trading on September 6th, 2001. The firm used to place some of the PUT options was chaired by an Executive Director of the CIA, A.B. “Buzzy” Krongard.

THE COLLAPSE OF THE TWIN TOWERS

The NIST Report admits that all the jet fuel burned off within 15 minutes. The remaining fires were fueled by office furniture and wallboards. It also admits that only the “worst case estimate” in their simulation resulted in any collapse.

Why does the NIST Report not explain what caused the rest of the towers to peel apart after the top started to collapse? They just refer to it as “global collapse” with no explanation of how that occurred in the undamaged sections.

Why wasn’t a desk, computer, phone, chair, stapler, or anything from the inside of an office found in the debris of the towers? A gravitational collapse may crush this material, but it would still be there. This is not the case with the collapse of the Twin Towers.

During the collapse, steel beams were hurled over 400 feet away from the buildings. Where did the energy come from to achieve this? Some were embedded into the sides of nearby buildings, like spears.

What caused most of the 400,000 cubic yards of concrete to be pulverized into dust? Gravity alone cannot explain the degree to which the towers were pulverized.

What could explain the bending of these giant steel columns? Where did the heat source come from to bend them without fracturing or cracking? It takes thousands of degrees to bend steel like this without any buckling or tearing on the tension side.

If the heat caused the trusses to sag and pull the perimeter columns in, thus initiating a pancake collapse, why were the 47 core columns not left standing as the floors pancaked around them like a spindle on a record player? The NIST computer simulation even shows these columns remaining, with no explanation of how they collapsed.

MILITARY DRILLS AND AIR DEFENSE FAILURES

Over 12 different military exercises were happening on that fateful day, some involving simulations of airliners crashing into the WTC and other targets.

Operation Tripod III was simulating a bio-attack on NYC and had FEMA pre-positioned in the city on September 10th.

Air traffic controllers and NORAD were confused which of the many false radar blips were real, and which were part of the exercise. They can be heard asking, “Is this real world or exercise?” How could Al Qaeda know drills would be run that day to add to the confusion?

Why was standard operating procedure not followed that when a plane goes off course, or radio contact is lost, jet fighters are immediately scrambled to visually check on the plane and its pilots?

Why were the tapes of the communication between air traffic controllers and the pilots/hijackers destroyed by the FAA?

BUT SOMEONE WOULD HAVE TALKED?

Secretary of Transportation Norman Mineta testified before the 9/11 Commission that he was in the Presidential Emergency Operating Center with former Vice President Cheney as American Airlines Flight 77 approached the Pentagon when:

There was a young man who had come in and said to the Vice President; ‘The plane is 50 miles out. The plane is 30 miles out.’ And when it got down to, ‘The plane is 10 miles out,’ the young man also said to the Vice President, ‘Do the orders still stand?’ And the Vice President turned and whipped his neck around and said, ‘Of course the orders still stand. Have you heard anything to the contrary?’ Well, at the time I didn’t know what all that meant.
– Norman Mineta

What order was Cheney giving, and was this a direct stand down order?

FBI counsel Colleen Rowley detailed how bureau higher-ups thwarted attempts to investigate accused 20th hijacker Zacarias Moussaoui prior to 9/11. Zacarias Moussaoui laptop contain evidence linked to 9/11.

FBI agent Robert Wright wrote a 500 page manuscript, “Fatal Betrayals of the Intelligence Mission,” in which he details how FBI bureaucrats “intentionally and repeatedly thwarted his attempts to launch a more comprehensive investigation to identify and neutralize terrorists.” His book has been illegally blocked by the FBI from being released.

Sibel Edmonds, a former translator for the FBI with top-secret security clearance, spent several hours in a closed session with the commission’s investigators providing information that was circulating within the FBI in the spring and summer of 2001, suggesting that an attack using aircraft was just months away and the terrorists were in place. The Bush administration went to great pains to silence her, even obtaining a gag order from a court by citing the rarely-used “state secrets privilege.”
